The International Society of Paediatric Oncology would like to acknowledge the efforts of the authors. SIOP is immensely grateful to all the authors for not only presenting state of the art lectures and occasional sessions at the meeting but for agreeing to produce a manuscript to assist in ongoing education for participants at the 37th meeting of SIOP in Vancouver 2005.
CONTENTS

Authors ............................................................................................................. 7
Preface ............................................................................................................. 9

Section A - Educational Session :
Trends in the Diagnosis, Surveillance and Treatment of Children with Malignancies – the role of Biologicals

1. Machinery of the Cell –
Principles of targeted diagnoses and therapies........................................ 12
2. Making the correct diagnosis –
Nuclear Medicine Tools ............................................................................. 15
3. Biopathological Techniques –
The Value of Molecular Diagnostic Testing in Paediatric Pathology .......... 21
4. Supportive care –
Present use of biologicals in supportive care ........................................... 25
5. Future –
Biologics in development ....................................................................... 29
6. Solid Tumors –
Role of biological agents in therapy ......................................................... 36
7. Ethical and philosophical –
Challenges of taking the ‘bench to the bedside’. ................................. 42

Section B – Breakfast Educational Session
1. Ewing’s Sarcoma ....................................................................................... 50
2. Non-Hodgkins Lymphoma ........................................................................ 53
3. Neuroblastoma .......................................................................................... 62
4. Medullablastoma ........................................................................................ 68
5. Acute Lymphoblastic Leukemia ................................................................. 70
6. Osteosarcoma ........................................................................................... 74
7. Acute Myeloid Leukemia .......................................................................... 79
8. Hodgkins Disease ..................................................................................... 87
9. Langheran cell disease ........................................................................... 100
10. Soft Tissue Sarcoma ............................................................................... 104
11. Germ Cell Tumor .................................................................................... 109
12. Low Grade Glioma ............................................................................... 117

Preface

On behalf of the local organisers of the 37th Congress of the International Society of Paediatric Oncology, the Board and Scientific Committee of SIOP we would like to thank the authors for their presentations and for inclusion to this educational book along with the participants who contributed searching questions and informed comments to all of the educational sessions. This is a new venture for SIOP and is warmly welcomed by the members. Professional education is one of the key components of the SIOP meeting. We are delighted that we have had the opportunity in the wonderful surroundings of Vancouver to be able to provide an increasing component of education to the meeting. SIOP and the Education Committee have put a lot of effort into trying to create the right environment for exchange of information and knowledge. We hope that whoever reads this text will benefit from it. We planned this as an experiment this year and we hope that it will become a permanent fixture of SIOP meetings. We of course would appreciate feedback on the value of the text and any comments on how we can improve the educational component of the meeting for future years. Good reading and best wishes.

O.B. Eden
